**Subject:** MSCS consistency review

Rick Soehren was requested by Steve Ritchie to do a consistency review of all the CALFED common program plans. Mary Scoonover made the request that he include the MSCS in that review, which he did.

Attached are his comments from that rather quick review of the MSCS. He did not have time to go through the tables either in the body of the document or attached.

I will be faxing out the document with my comments on it to the authors of concern, though I'm not sure how easily my scribbles will fax.
